

Ramirez Tech Systems LLC

Capability Statement

Company Overview

Ramirez Tech Systems (RamirezTS) is a Virginia-based technology services provider specializing in DevOps engineering, secure infrastructure support, and high-assurance workflows for government and enterprise environments. We help customers modernize systems, automate operations, and maintain compliance across classified and unclassified networks.

Core Competencies

DevOps and Automation

- Secure CI CD pipeline development
- Infrastructure as code and automation
- Containerization and image lifecycle management
- Git, GitLab, and GitHub workflow engineering

Secure Systems and Environments

- Support for top secret and air-gapped environments
- Cross domain solution integration
- System hardening and STIG alignment
- Controlled data flow engineering

Cloud and Platform Engineering

- Cloud operations (hybrid, on-prem, and secure cloud)
- Kubernetes support and container orchestration
- Linux systems engineering and administration
- Monitoring, observability, and logging solutions

Engineering Support

- Documentation and diagrams for accreditation

- Troubleshooting and root cause analysis
- Workflow optimization for secure facilities
- Technical support for government customer teams

Differentiators

- Hands-on experience supporting classified environments and secure SCIF operations
- Strong understanding of government workflows and mission constraints
- Agile, responsive, and highly technical engineering support
- Ability to simplify complex secure architecture for new team members and stakeholders
- Expertise in DevOps modernization inside restricted and disconnected networks

Past Performance

- Supported secure DevOps modernization efforts for classified systems
- Automated infrastructure workflows for government operations teams
- Designed and documented cross-domain data paths for accreditation packages
- Delivered 24x7 support and troubleshooting for mission-critical secure services

NAICS Codes
